

Earth's Money: A Simple Guide to the People's Ledger

What is Money?

Money is a decentralized, eco-friendly digital currency that doesn't require mining, blockchain, or energy-intensive systems. It runs on smartphones. It is validated by people. It belongs to everyone.

The Philosophy

- No pre-mine
- No CEO
- No hidden rules
- No elite validators
- No coins given to insiders

Just people. Just phones. Just Money.

How It Works

1. Send a Transaction

2. You open the Money app
3. You send MONEY to someone

4. Swarm Validation Begins

5. The transaction is broadcast to a group of randomly selected smartphones
6. Each phone verifies:
 - The signature is valid
 - The sender has enough balance
 - The transaction has not been seen before

7. Consensus via Signatures

8. Once a threshold number of phones validate it (e.g. 500+), the transaction is considered confirmed
9. The state of the ledger updates for all

10. Ledger Sync

11. Every phone holds a copy of the current state

12. Syncs happen via a lightweight gossip protocol with Merkle proof integrity

Privacy

Money uses full privacy by default. No one can see who sent what to whom. Even validators can't see the real amounts.

Supply

- Starts at 1,000,000 MONEY
- For every 1,000,000 new verified users, 1,000,000 new MONEY are created
- No central issuance. No inflation unless the people grow.

What Counts as a Verified User?

A smartphone that:

- Has the Money app installed
- Has helped validate at least one transaction
- Uses a unique IP address

Only one active device per IP is counted toward user growth.

No Rewards?

Correct. Validators do not earn MONEY. This keeps the system honest, free from greed, and resistant to centralized exploitation.

Why Use Money?

- Almost instant transactions
- Near-zero fees
- No third parties
- Works anywhere with a smartphone and internet
- Can't be censored, paused, or defunded

Who Built Money?

No one knows. And it doesn't matter. The rules are open. The code is public. The ledger is yours.

Tagline

Money. For Everyone. Forever.
